

# Jakob Kjellerup

Software Engineer student with a passion for learning.

## Portfolio

<https://sorekjen.github.io/portfolio>

 Danish - Native

 English - Fluent

## Skills

Agile development

JavaScript

Java

.NET / C#

HTML / CSS

SQL

Communication

Adaptability

## Interests

If I am not working on my current project I am probably playing boardgames, cooking some great food in the kitchen or connecting with nature with a good walk.

**Drivers License B**

Software Engineer student taking my degree at Via. Passionate and sharp, with focus on great teamwork and good communication. I love working with new problems and developing elegant solutions for them. The software world is constantly evolving but with my foundation and mindset, I am always prepared to learn something new and improve my skills. I look forward to working with skilled colleagues and taking on challenges together.

## Education

**Software Engineer • Via University College - Horsens**

Bachelor of Engineering

august 2021 - january 2025

In my time at Via we spend our time learning about various technologies and processes but most importantly we get hands on experience. Here are some of the things that I have experience working with.

- Agile softwaredevelopment and Scrum
- Java and frameworks such Spring and Hibernate
- .NET and C#
- SQL and relational databases
- JavaScript, HTML and CSS
- React and Tailwind
- Algorithms and datastructures
- Git and Github
- Devops and CI/CD
- Critical thinking and problem solving

## Work Experience

**Youth worker at distribution center • Scan Global Logistics**

Part-time

2016 - 2017

At Scan Global Logistics I got a taste of what it is like having responsibility for various tasks in a professional setting.
